

NATIONAL MARITIME SAFETY AUTHORITY

NOTICE TO SHIP OWNERS, SHIPPING AGENTS, SHIP MASTERS, PILOTAGE SERVICE PROVIDERS, MARINE PILOTS, PORT FACILITY OPERATORS AND ALL CONCERNED STAKEHOLDERS REGARDING USE OF PILOTS (PCL01/2022)

A notice to all Stakeholders, Marine Pilots, Vessel Masters, Pilotage Service Providers and Concerned Parties by the National Maritime Safety Authority (NMSA) as the statutory regulator of the shipping industry in PNG.

The NMSA would like to notify everyone that all Audits on the Safety, Environment and Quality Management Systems for all Marine Pilotage Service Providers that were issued with Pilotage Service Provider Licenses as well as new intending applicants for pilotage service providers' license will be done by the International Standards for Pilotage Organizations (ISPO) for the purpose of impartiality.

The ISPO is an IMO approved international marine pilotage standard that is also recommended by NMSA as the pilotage authority to provide accreditation to marine pilotage organizations.

The focus of the audits will be mostly on each pilotage service provider's Safety, Environment, and Quality Management Systems in accordance with the requirements of the Guidelines for Marine Pilotage Standards and the ISPO standards.

These audits are required to ensure all license holders are complying with the conditions of the licenses that were issued and to ensure noncompliance issues are identified for appropriate measures and or penalties to be given including revocation of licenses where necessary.

Each Pilotage Service Provider is also advised to make available copies of your valid Insurance Covers at the time of these audits.

The NMSA requires co-corporation from all pilot service providers to ensure these audits are carried out efficiently.

The NMSA is also providing its updated list of the Marine Pilotage Licenses that were issued by the authority.

This update is necessary for all stakeholders, including shipping agencies in the Papua New Guinea maritime industry to be aware of and identify only Marine Pilots and Marine Pilot Service Providers licensed by the National Maritime Safety Authority that may be engaged for pilotage duty or services.

The updated list is for marine pilot license classes 1, 2, 3, respectively and their approved areas (ports) of operation.

The listed names are the only marine pilot license holders that are recognized by the authority to conduct marine pilotage services at the respective ports. The same list can be also accessed on the NMSA website – www.nmsa.gov.pg under Notices section.

Individual Licensed Marine Pilots that are not active are reminded that those found to be engaged in providing pilotage services with non-licensed Pilotage Service Providers will have their license revoked by the National Maritime Safety Authority.

All Licensed Pilotage Service Providers must have the following in place for their operations.

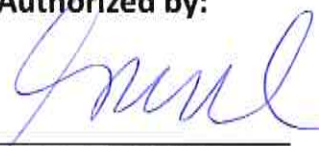

1. Proper Fit for Purpose pilot boats,
2. Valid & adequate insurance policy cover for profession indemnity, public liability and workers compensation, and
3. ISO Certified Safety, Environment and Quality Management Systems.

All trainee pilots including lower class pilots applying for upgrade of pilot license as well as pilots applying for new additional ports of operation must have all their pilotage training records endorsed by supervising pilots at the close of each individual pilotage movements accordingly to be presented when applying for pilot licenses.

All licensed pilots whose license will be expiring in the next coming months must compile their application documents for revalidation of the license and submit renewal applications two (2) months prior to the licenses being expired.

For more information, please contact the National Maritime Safety Authority on Telephone 305 4600 or email wabegul@nmsa.gov.pg.
